meri

SINCE
1932

Jaan

Nine decades of unbroken tradition.
Nine decades of resilient service—through wars and
weddings, mountains and gullies. Like its riders, this
legendary machine is made of soul, sinew and steel.

The 2023 Bullet.
New heart. Same beat.

BLOODLINE

Most motorcycles come and go, but a chosen few become icons. The Bullet 350 isn't just a machine. It's a legend with a legacy of over nine decades. It has carried generation after generation of riders to the most important moments of their lives. Today, its history gleams as bright as its gold pinstripes, each stroke a testament to the Bullet's valor and spirit.

STEEL

An iconic silhouette, a steadfast chassis and an unwavering heart. In the last ninety years, the Bullet 350 has established itself as a resolute ally for the bravest of the brave. From the unforgiving battlefields of the 20th century to the most treacherous terrain of the Himalayas, it has proven its resilience over and over, becoming a symbol of strength and fortitude.

HEART

The heart of the Bullet 350 is more than just metal and machinery. It's strength, stoicism and pure soul. All of this remains unchanged even as the motorcycle shifts on to our J-platform. A brand-new, 349cc engine delivers dollops of torque, even down low on the rev range, and a crystal clear thump that hits the spot every single time.

BACKBONE

The 2023 Bullet maintains its signature undaunted, upright riding stance. The new, redesigned twin downtube cradle frame, with a 19" front and 18" rear tyre, promises greater confidence and a more grounded riding experience on every ride.

FEATURES

From its timeless silhouette to its distinctive thump, the 2023 Bullet retains all the hallmarks of its predecessors, while introducing a series of new upgrades designed to enhance your riding experience.

A top-down view of the front of a Royal Enfield Bullet 350 motorcycle. The image is dominated by the instrument cluster, which is centrally located and features a large analog speedometer with a needle and a digital display below it. The speedometer has a scale from 0 to 120 km/h. To the left of the speedometer is a circular gauge for fuel level, and to the right is a circular gauge for engine temperature. The instrument cluster is housed in a black plastic casing with chrome accents. The motorcycle's handlebars are visible, with a chrome horn on the right side. The fuel tank is black with orange and silver decorative stripes. The background is black, with a vertical gold stripe on the left side.

UPDATED INSTRUMENT CLUSTER

A new, digi-analogue instrument cluster is the perfect mix of tradition and technology, providing precise information while retaining the timeless aesthetic of the Bullet 350.

DUAL CHANNEL ABS

Engineered to take on every challenge, the anti-braking system with 300mm front and 270mm rear disc brakes allows you to ride steady and halt smoothly, even on the roughest of roads.

ALL-NEW SEAT

The reimagined signature single bench seat has more space and improved under-thigh support, ensuring complete comfort on both quick trips and long journeys.

ROTARY SWITCH CUBES

New and improved rotary switch cubes retain the tactile satisfaction of old-school cubes while making it easy to power up or take off.
